

# ECO HOT LIST

*The Eco Hot List is back with a bang, throwing light on the travel pioneers who are growing back greener!*

## COPENHAGEN TRIALS 'PARKIPELAGO' CONCEPT

The design savvy Danes have responded to the rising sea levels and rapidly expanding cities by creating a series of experimental floating public spaces. The wooden islands, currently situated in Copenhagen harbor, offer whimsical public spaces that can be used as floating gardens, mussel farms and swim zones, or simply as a quiet oasis offering respite from the city. Expect to see more cropping up on our shorelines in the future.

## SUSTAINABLE BOOKING SITE LAUNCHES

Beyond Green makes booking an environmentally conscious holiday a breeze. Hotels are cherry-picked for their efforts in protecting biodiversity and cultural heritage while offering a luxe experience. Our top pick is the Wilderness Safaris Bisate Lodge in Rwanda, which is actively engaged in scientific research on mountain gorillas. [Learn More](#)

## DEEP-DIVE INTO A CORALARIUM IN PARADISE

One of the few silver linings from the past year has been witnessing nature reclaim its space. This is particularly evident at the Fairmont Maldives Sirru Fen Fushi resort, where their coral regeneration project and underwater art gallery has recently flourished with new aquatic visitors and an increase of 20-30% coral growth. Visitors can now explore the Coralarium, the first of its kind in the Maldives, with tropical fish, manta rays and turtles for company. [Learn More](#)

## FARM STAY IN STYLE

Helping kids to reconnect with nature is currently top of many parent's agenda and the Craveiral Farmhouse in the rugged hills of Portugal's Alentejo Region provides the perfect spot for a back to nature break. Kids can get hands-on at the onsite educational eco farm, caring for the animals and assisting at the vegetable garden and orchards. Sample their farm to table cuisine at the renowned restaurant, or there's the option of homemade picnics and horse riding in the scenic landscape. [Learn More](#)

## GO GREEN IN ALABAMA

Visitors looking for a low impact break in America's Deep South, should head to the Alabama Gulf Coast. The eco-award-winning Lodge at Gulf State Park is the kind of resort where sustainability is factored into all aspects, from the hay drinking straws to the natural landscaping, which blends harmoniously with the surrounding sand dunes. Kids will love exploring the onsite nature centre, showcasing the native wildlife such as turtles, hawks and owls. [Learn More](#)

## SOLAR POWERED SAFARI MICROBREWERY

Safari sundowners have been given a sustainability twist, with the launch of the first solar powered microbrewery in the African bush. Taking pride of place in the new Sayari camp in the Serengeti, the ground-breaking brewery removes the need for plastic bottles and cans in camp, not only reducing waste but also reducing the transport carbon footprint. The dinky brewery makes both soft drinks and beer, of which it produces four unique variations. Cheers to that! [Learn More](#)
